Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
There is no signature or date of execution for the declaration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Caverly.

Caverly shows a square base B in Figure 1 having ends; sidewall at F in Figure 1 having a flat top surface; flat inward wall abutting the flat wall of the container as seen in Figure 2; curvature C; and handle as the nozzle of container A.

Allowable Subject Matter

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The curved bottom surface of the second foot being seamlessly formed with the curvature of the outward wall of the sidewall, in combination with the other claimed elements, is not found in the prior art.

Art Unit: 3754

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Caylor, Berger, Aldridge, Higham, Catlin and Robins show other container tilting devices.
